OM GAJAANANAM NAMAMHYAM

I am very happy that Sri MK Viswanth has launched his AstroVision E Magazine from January 2008 and giving me an opportunity to contribute this Article which was already discussed in KP Astrologers Forum, Hyderabad and Yahoo groups of KP Astrologers and KP Systems also.

As per kp system a correct birth time is inevitable for arriving at right cuspal sublords for accurate prediction.

During the KPAF, Hyderabad fortnightly meeting conducted on 9th September 2007 one KP Astrologer /Participant of the Meeting reported a case study of twin births; viz. dob 27.9.2004, tob 11.38 (first) and 11.39 (second) pob: Minneapolis State Minnesota. When a doubt was raised about the one minute difference in birth time of the above twins, **Sri Rajendra Nimje, IAS.**, (Addl. Chief Electoral Officer of Govt of AP) President of KPA Forum has informed the participants that it is possible as per the medical history.

I analysed those two charts of the Twin Births (appended herewith), the Gentlemen

who reported that the second child was keeping good health and first child is not so, and he wants to know reason for the same through kp principle in these charts.

On analysis it was found that the 1st cuspal sub lord of first child is Mars who is lord of 1st and 6th for Scorpio Ascendant and not well since birth.

Mars is 1st & 10th Cuspal Sublord (no planet is tenated in its star) is in Sun's star (10th) and sub of Kethu in Rahu star who is in conj. to 6th cusp signifies 1st, 6th (vacant), 10 indicates sickness. Present Mahardasa is Jupiter x Rahu till 18.5.2008.

The second child 1st Cuspal Sublord is Rahu who is in Kethu's star and sub of Jupiter signifies 5th and 11th houses hence his health is good.

The twin charts which gives clue for cuspal sublords significance within one minute of difference of time of birth. In the first child the 5th Cuspal sublord and 6th cuspal sublord is mercury who is lord of 8th & 11th in 10th in the star of Sun.

Whereas in the second child's chart the 5th Cuspal Sublord is kethu a strong significator of 5th & 11th houses. 6th Cuspal Sublord is mercury same as above connected to Sun in 10th as lord of 8th and 11th. In this Chart the 5th Cuspal is health lord is not connected to 6th cusp hence he is keeping good health.

Nirayana Bhava Chalit-Cuspal

An email on yahoogroups in kpsystem from Sri Venkitsubbiah has received on 19.11.2007 reporting twin births where the cuspal sublords are the same: QUOTE:

I got horoscopes of twin babies, Data is like this DOB:29-jan-2006, 7:00PM, Trivandrum, Kerala, India (76 E 55; 8 N 29), The time of birth of younger one has only 3 min difference (ie. 7:03PM). Elder child is a girl and the second one is a male. But the horoscope seem to be same, even in the sub level. The elder child has always fever and other type of problem. How could I justify this using KP system of astrology in these horoscope. Please help me. Thank you -venkit UNQUOTE:

In this analysis Sri LY Rao has opined a good software has to be selected for deciding this type of twin cases where the time of birth is marginal (with less) differs and the sublord is key factor as per KP System to point out the difference between the twins. Sri MK Viswanath opined that it is pertinent to point that this type of typical twins horoscopes should be determined after going through BirthTimeRectification methods only.

Now I have gone through these time of births of the twins by applying standard Birth Time Rectifications were made and the first child was girl at 7.05pm (DOB:29-jan-2006, 7:05 PM, Trivandrum) wherein the 1st csl is Rahu is in 8th house Pisces female/even sign and in the star of Pushyami - Star Lord Saturn is in Cancer another even sign hence a female child is indicated. As per 4 Step Theory, Rahu is the primary significator of 8/rahu (Jup 3,6,9) 12,7 by Saturn. Rahu's sublord is Moon who is in his own star, 6p/Moon, hence Rahu Saturn Moon related to health problems for the first female child as given by Sri Venkit.

Second twin was boy at 7.09pm wherein 1st cuspal sublord is Jupiter (see the change in first csl from Rahu to Jupiter). Jupiter is in Libra an odd sign in his own star hence a Male Child is indicated. Jupiter as sublord of first house in 4 step theory (Sri Sunilji) in his own star occupant of 3rd bhava and lord of 6th & 9th not empty, hence only primary significator of 3 house, sublord Saturn in his own star signifies 12th and 7th hence this child is maintaining good health.

Nirayana Bhava Chalit-Cuspal

Another case study of Twins Sri Aditya/ Sri Ravi Teja who were born on 3.4.1988, time of births are 15.34/15.38 hrs at Secunderabad Lat. 17N22 Long. 78E28.

The following are the major differences between the twins with a difference of 4 minutes in the birth time. Sri Aditya was born at 15.34hrs and Sri Ravi Teja at 15.38 hrs. The difference in 4 minutes would have an impact of a different cuspal sublords of the following cusps –

1st : individual features such as colour, height and characteristics ,

4th : education, properties, relations with mother,

6th : service and health, financial gains,

8th : longevity, disappointments, obstacles, inheritance,

9th : relation with father, higher education, job opportunities, travelling,

10th : job, profession, status and position,

11th : labha of all round, such children, wife, money, job, education, wealth, etc.

12th : expenses, disappointments, philosophical, charitable, etc.

In the above areas the twins would differ from each other because the cuspal sublords are different from each other, hence their life styles would also change not only in the 1st house colour, features and characteristics but also in education, service, health, longevity, higher studies, profession, spending habits and moksha sthana.

1st Cuspal Sublord being Jupiter for Sri Aditya indicates fair and god fearing, conventional, long life,

1st Cuspal Sublord Saturn for Sri Ravi Teja indicates lean, tall, medium complexion, very steady and balanced, conservative, likes elderly people.

On verification, the parents informed that the boys are possessing the same characteristics and features as indicated by the lagna cuspal sublord.

In twin births normally the time of birth is very close to each other and lagna cuspal sublord would only give the clue for their variations in physical appearance (in many cases difference is very minute except parents are very much able to differentiate between them) and characteristics. However when we compare with the other bhava cuspal sublord the life style would be more clear, relating to education, job, marriage, birth of children, etc.

Sri Aditya
